BERNAND TRIANDA FIRMANSYAH

Fresh Graduate Computer Science Student | System Development Intern

6281330760966 | bernand.fir@gmail.com
LinkedIn | Portfolio | Tangerang, Indonesia

PROFESSIONAL SUMMARY

Computer Science graduate from Bina Nusantara University with hands-on experience in system analysis, business process improvement, and application support through internship and academic projects. Experienced in gathering user requirements, translating business needs into functional solutions, developing automation scripts using Python, and collaborating with cross-functional teams to improve operational efficiency. Familiar with software development lifecycle (SDLC), system documentation, SQL, Power BI, and Microsoft 365. Highly motivated to contribute to system development initiatives by supporting application implementation, documentation, testing, and continuous system improvement.

EDUCATION

Bina Nusantara University **Sep, 2021 - Aug, 2025**
School of Computer Science / Bachelor of Computer Science
GPA: 3.62 / 4.00
Final Thesis: *Mining Social Media for Financial Insights: The Impact of Public Sentiment on Cryptocurrency Price Movement*
Grade: A

EXPERIENCE

Information Technology Intern (Human Resources Information System) **Sep, 2024 – Oct, 2025**
PT TUV NORD Indonesia

- Supported the Human Resources division by providing IT support and troubleshooting technical issues to ensure smooth daily operations.
- Developed interactive HR dashboards using Looker Studio by integrating data from Google Sheets, enabling real-time monitoring of key HR metrics.
- Validated, cleansed, and maintained HR data using Microsoft Excel to ensure data accuracy, consistency, and reliable reporting.
- Collaborated with HR users to identify reporting requirements and translate business needs into dashboard and system improvements.
- Monitored dashboard performance, investigated data inconsistencies, and coordinated with team members to resolve issues and improve reporting quality.
- Assisted in preparing system-related documentation, reporting guidelines, and user support materials to facilitate system usage and knowledge sharing

PROJECT HIGHLIGHTS

Crypto Sentiment Forecasting Dashboard (ARIMA/SARIMA + Streamlit)

- Analyzing the relationship between public sentiment and Bitcoin price movements using forecasting models and presenting insights through an interactive dashboard.

Student Enrollment Interest Prediction & Clustering Analysis

- Developed a predictive analytics model using Regression Analysis and Clustering to forecast student enrollment trends and identify regional study program interest patterns across Indonesian provinces.
- Performed data preprocessing, exploratory data analysis (EDA), and data visualization to generate insights that supported data-driven decision-making and strategic education planning.

Interactive Website — Piscis Aquarium

- Designed and developed a responsive website using HTML, CSS, and JavaScript.
- Implemented interactive features and optimized user experience through testing and debugging.

SKILLS

Technical Skills

- Python
- SQL
- Power BI, Looker Studio, Google Sheet, Microsoft Excel
- Power Automate, Microsoft 365

Soft Skills

- Analytical Thinking
- Problem Solving
- Communication
- Collaboration
- Adaptability

CERTIFICATIONS

- Google Data Analytics — Coursera
- Data Science & Artificial Intelligence — BINUS University

ACHIEVEMENTS

- Delivered presentations at GAIB 2025 and SIET 2023 international conferences.
