PROFESSIONAL SUMMARY

Computer Science graduate (BINUS University) in System Development for Enterprise Risk Management at PT Citilink Indonesia. Builds web-based monitoring systems, Power BI dashboards, and workflow automation for Risk & Compliance Monitoring, combining full-stack development (Laravel, PHP, MySQL, JavaScript) with business analysis: gathering requirements, mapping workflows, and turning business needs into reliable systems.

EXPERIENCE

System Development, Enterprise Risk Management **2025 – Present**
PT Citilink Indonesia

- Develop and enhance web-based Risk & Compliance Monitoring Systems with Laravel, PHP, MySQL, and JavaScript, covering risk registers, monthly monitoring, mitigation tracking, reporting periods, filtering, and data workflows.
- Built the **Risk Mitigation Progress Tracker** and **Compliance Fulfillment Tracker**, monitoring 18 risk events, 66 mitigation actions, and 54 compliance checklist items for Shareholder Loan (SHL) and Capital Injection (CI) monitoring.
- Built Power BI dashboards with DAX, data modeling, and KPI design to give management a clear view of risk, mitigation, and compliance status.
- Developed the **Business & Risk Review Tracking Portal**, digitizing the end-to-end Business Review and Risk Review process with automated data sync from SharePoint to Google Sheets and a Google Apps Script web dashboard.
- Built the **Email-to-SharePoint Auto-Filing System**, which files incoming Outlook emails and attachments into the right SharePoint library automatically.
- Translate business requirements into system solutions by analyzing workflows and defining functional requirements; support data processing and validation with SQL and Python.

Information Technology Intern (Human Resources Information System) **Sep 2024 – Oct 2025**
PT TÜV NORD Indonesia

- Developed interactive HR dashboards in Looker Studio with data from Google Sheets, enabling real-time monitoring of key HR metrics.
- Validated, cleansed, and maintained HR data in Microsoft Excel to ensure accurate, consistent, and reliable reporting.
- Collaborated with HR users to identify reporting requirements and translate business needs into dashboard and system improvements; investigated data inconsistencies with the team.
- Provided IT support and troubleshooting, and prepared system documentation and user guides.

EDUCATION

Bina Nusantara University **Sep 2021 – Aug 2025**
Bachelor of Computer Science · GPA 3.62 / 4.00
Final Thesis (Grade A): *Mining Social Media for Financial Insights: The Impact of Public Sentiment on Cryptocurrency Price Movement*

PROJECT HIGHLIGHTS

Crypto Sentiment Forecasting Dashboard (Python, ARIMA/SARIMA, Streamlit)

- Analyzed the relationship between public sentiment and Bitcoin price movements with forecasting models, presented through an interactive dashboard.

Student Enrollment Interest Prediction & Clustering Analysis (Python)

- Built regression and clustering models to forecast enrollment trends and identify regional study program interest across Indonesian provinces, with preprocessing, EDA, and visualization.

SKILLS

Development: Laravel, PHP, MySQL, JavaScript, HTML, CSS, Next.js, React

Data & BI: Power BI (DAX, data modeling, KPI design), Looker Studio, SQL, Python, Microsoft Excel, Google Sheets

Automation & Platforms: Google Apps Script, Power Automate, SharePoint, Microsoft 365

Business Analysis: Requirements gathering, workflow mapping, functional requirements, SDLC, system documentation; analytical thinking, communication, collaboration

CERTIFICATIONS & ACHIEVEMENTS

- Google Data Analytics Professional Certificate (Coursera); Data Science & Artificial Intelligence (BINUS University); Software Engineer Certificate (HackerRank); CompTIA A+ 1000 Part 2; TOEFL ITP 530.
- Research Team Leader and presenter at GAIB 2025; presenter at SIET 2023 international conference.
